EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please cancel the second of two entries of both claims 24 and 25.

The above amendment was necessary because Applicant had added two claims 24 and two claims 25, both pairs of which recited precisely the same subject matter.

The Examiner agrees with Applicant's assertion that there are too many permutations of a method of making a hydrocarbon-phenol copolymer taught by *Bogan* for the instant invention to be rendered obvious by this reference insofar as Applicant has disclosed a clear benefit that is associated with regulating the O-alkylation to aromatic ring carbon alkylation during the first stage of the process. Indeed, there appears to have been no previous recognition by *Bogan* or others that have disclosed the preparation of similar copolymers that polymer coloration may be vastly improved by manipulating the process to ensure the formation of a certain minimum quantity of the O-alkylation product in the first step of the process.

In an updated/modified survey of the prior art, the Examiner encountered Gerber, U.S. patent # 6,291,723, which teaches a process wherein a hydroxyaromatic

compound and a diolefin are reacted under conditions that provide a product ratio of the O-alkylated product to C-alkylated product of 0.5 to 1.5. However, there is no subsequent step mentioned that is carried out at a higher temperature that results in the rearrangement of the O-alkylation product to the C-alkylation product as is done in step (2) of the claimed process.

The references cited during this prosecution represent the most relevant known. Because they fail to even render obvious the claimed invention, claims 3, 6, 8-9, and 12-27 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.
